OVERVIEW

BRIDGE Cavity Splitter is the product to split power by equal ways, usually it includes 2 ways, 3 ways and 4 ways. High power handling is the cavity splitter feature. Widely used in indoor signal coverage to distribute the power to antenna points.

BRIDGE Cavity Splitter uses wide band technology to coverage the wide band range signals from 698-3800Mhz. It reaches -160dBc PIM value by Low PIM and fully plating technology, which is good to provide high data transmission coverage needs. Widely used in GSM /WCDMA / LTE network.

In the section of materials selection, Bridge products are all taking good and rugged materials as option, which will make sure long product working life and stable working performance.
